

PROMOTION

Improve Efficiencies of Radio Access Verification

Trade in your old cell site analyzer for the All-in-One OneAdvisor 800

VIAVI OneAdvisor 800 is the ideal portable test solution to verify and troubleshoot radio access networks for proper deployment and effective operation.

Cell Site Installation (Cable and Antenna Verification)

- Cable and antenna: reflection tests, distance to fault and cable loss
- Job manager: configurable test procedures and consolidated reports
- Smart Access Anywhere: remote control connectivity
- Capable of fiber verification if equipped with OTDR module
- Capable of antenna alignment verification if equipped with RF Vision

OneAdvisor 800A Bundle with Cable Analysis
